Attachments: Subpart W Draft-EIA-BID - OMB Update (3).docx

Reid,

Done, for version control I changed (2) to (3), and deleted “-sfm –clean”.

I took a quick scan through the document, and made 2 additional changes: (b) (5) - Deliberative process privilege
[REDACTED]; and 2) pages 58/59—changed text in 3 places to refer to Figure 14 instead of 21.

Now that we’ve agreed upon the technical changes, I can run the document through an editor, if you wish.

Steve

Steve,

I’m good with the changes. I agree that we should delete the phrase at the top of page 121. I did not do that on the clean copy. Will you please delete the phrase and send the new clean copy back to me? This way we have version control. Thanks

Reid

Reid,

Attached is the revised BID/EIA, with track-changes.

In a separate email I’ll send you a clean version with all changes accepted, comments deleted, the TOC updated, etc.

I recommend that you look at the track-change version to see what changes I made, and if you agree with them, then use the clean version from this point onward.
Even if you have some minor edits to the changes, it may be easier to do them on the clean version.

Let me know what you think.

Steve

Subject: BID Comments

Hi Steve,

I've reviewed the BID and I have just a few comments, included in the document. I accepted as many comments changes as possible, but some I didn't want to mess with, like the TOC changes. After these changes I think we're good to go.
Thanks.

Reid
